Drop-In Anchor with Lip Bucket

Drop-in anchors are versatile medium duty anchors that deliver ample load bearing performance at shallow embedments. An expansion wedge inside the anchor is pushed towards the bottom end, thus producing expansion forces. The generated expansion force produces frictional resistance during anchor loading.

DROP-IN ANCHOR BUCKET KNURLED / 12X45 BITS / HANDLE

Part	QFind	Size	Length (mm)	Finish	Pack Qty

INSTALLATION

1. Drill the required hole diameter size ($d_{h=12mm}$) using the included drill bits.
2. Clean the hole by blowing dust out.
3. Install the anchor into the drilled hole.
4. Set the anchor by placing the setting tool into the anchor and then hitting with a hammer until pin is set.
5. Install the fixture and the appropriate size bolt. (Recommendation: Use a torque wrench to install the bolt to specification.)
6. Installation is complete.
