APPLICATIONS

- Used as a tie down system to secure roofs on block style homes in cyclonic conditions
- Rebar is fed through the bottom hole inside the concrete block before concrete is poured over it. The trusses then bolt through the top hole

FEATURES

- D1 hole bolts the truss while D2 hole is used for the rebar
- D2 hole is larger to fit threaded rebar
- Hobson's range is available in different hole sizes to suit various applications and bolt sizes
