

STAINLESS STEEL FASTENERS WITH 12.9 STRENGTH

Are your 12.9 carbon steel fasteners failing due to corrosion, embrittlement or fatigue? Well, you are not alone. Finally, there is a solution: BUMAX® DX 129 is a duplex stainless steel fastener that combines strength, corrosion resistance and ductility for the most demanding environments.

BUMAX® DX 129 features:

- Tensile strength: min 1200 MPa and yield strength: min 1080 MPa
- Elongation: Significantly better than 12.9 carbon steel
- Corrosion resistance: Significantly better than A4 (316L)
- Available off the shelf in dimensions M6-M16 in hexagon socket head cap
