Metal Wings Countersunk

Metal Wings Countersunk (SDS) #14-20

Applications	
<ul style="list-style-type: none"> • Timber to metal fixing • Fences, chipboard, composite panels and timber floors • 6 ribs under the head enable self embedment into timber 	

Material	 C1022 Hardened
-----------------	--

Finish	 Class 3
---------------	--

Pullout Values				
Plate (Purlin)	Metal Plate Thickness	¹ Mean Load	² Characteristic Load	³ Working Load
	(mm)	(N)	(N)	(N)
G2	0.7	850	750	300
G2	1.2	1750	1650	650
G550	1.5	3450	2800	1150
G450	2.0	4700	4100	1650
G2	3.0	6500	5750	2300
HRS	5.0	15800	13200	5300

Drill Point Test					
Plate (Purlin)	Metal Plate Thickness	Load	Drill Speed	Drill Time	Drill Time
	(mm)	(kg)	(RPM)	(Max. individual) Seconds	(Max. average) Seconds
G450	2.0	18	2200	6	5

Note: 1000N = 1kN

¹ Mean Load/Strength is the average ultimate strength of samples tested.

² Characteristic Load/Strength: 95% of these screws are expected to have a strength greater than the loads shown.

³ Working Load is the governing minimum allowable load obtained by comparing relevant concrete and steel working loads. Factor of Safety (FOS)=2.5 for steel, FOS=2.5 for timber and FOS=3.0 for concrete) are already included.

All values are obtained under laboratory conditions using DRILLX product. Safety factors should be considered for design purposes. Actual pullout loads may differ slightly depending on certain properties of the base material.

14 Gauge with CSK Wings

Wings assist in producing a clearance hole in timber

- Wings break off once the screw starts to drill through the metal

Mechanical Properties				
Torsional Strength	¹ Mean Tensile Strength	¹ Mean Shear Strength	² Characteristic Tensile Strength	² Characteristic Shear Strength
(Nm)	(N)	(N)	(N)	(N)
16.9	19750	11850	19150	11500

Installation

Technical Note:

Wing screws are not recommended for fixing long lengths of timber directly to steel joints. The screw may break in the application due to potential movement between the metal and timber caused by:

- Thermal expansion
- Humidity
- Building movement/settling
- Overdriving during installation

Recommended
IHEX Size #5 mm Drive Bit:

Part	QFind	Size
		(mm)
TXDIIHXS50025	B346	25

Installation Guide

1. Use a cordless screw driver set between 2,200-3,000 RPM. Fit the IHEX Drive Bit over the screw and place at the fastening position.
2. Apply consistently firm pressure to the screw driver while the screw is drilling.
3. Care should be taken not to over-tighten the screw.

*Installation with impact drivers not recommended.
